

GLOBAL FIBER TECHNOLOGIES, Inc

Global Fiber Technologies (OTCQB: GFTX) is a public company comprised of three separate operating subsidiaries which are driving fiber industry innovation through technologies related to fiber rejuvenation, authentication and distribution.

Each subsidiary will draw on its technology and/or trade secrets combined with first mover advantages to give Global its competitive advantages now and in the future.

The Three Subsidiaries

1. Authentic Heroes Inc. A company specializing in developing limited edition *fanwear* from original event worn garment/apparel.

Authentic Heroes is creating an entirely new segment of licensed clothing by taking game or event worn clothing of athletes or celebrities, extracting the fiber and incorporating it into limited

edition collection of clothing creating a new segment of the licensed clothing market.

Authentic Heroes will be Launching in the 3rd quarter of 2019.

2. Fiber Chain, Inc. A company specializing in creating a revolutionary global business transaction platform for the efficient trading and tracking of fiber reducing transaction times from days or weeks to just minutes while simultaneously reducing costs.

We expect Fiber Chain to launch in the fourth quarter of 2019.

3. Ecotek 360, Inc. An apparel rejuvenation and recovery company utilizing patent pending technology which takes landfill destined corporate uniforms and repurposes them back to the same company as high quality and wearable apparel for their employees helping reduce carbon footprints and saving billions of gallons of water in the process.

Ecotek 360 will also be launching in the fourth quarter of 2019

Our first revenue generator: Authentic Heroes

“True Fanwear Originals”

While all three subsidiaries are driving innovation in their respective markets the near-term revenue opportunity that Authentic Heroes represents is both boundless in its applications.

Until now owning an article of clothing worn by an icon could only be afforded by “the few”

Authentic Heroes will bring ***affordability*** and ***authenticity*** to the collectible/wearable clothing business. In effect, ***democratizing*** what was once the unachievable for most fans.

A.The Process

The genesis of our process is our ***patent pending*** technology which allows us to extract the ***original fibers*** from a single ***game or event*** worn garment and make a limited series of collectable and wearable ***“fanwear”***.

Once the fibers from the original are extracted, they are combined with **virgin** fibers and then **marked** by digitally encoding them to create the core of the fabric which will be used to create the final garment.

As each garment is created the digitally encoded fibers are placed throughout the **entirety** of each of our limited series items so the fibers from that historic moment radiate throughout the garment.

A digital “pen light” which we include with each purchase will allow the “visibility” of the very fibers centered around the history of the original garment

We further the authenticity of each garment with both a “Certificate of Authenticity” signed by the icon as well as the registration of the purchased garment through the scanning of the QR Code stitched to the clothing.

The QR scanning allows each garment’s true ownership to be recorded in a personal **online vault** at the Authentic Heroes Website.

Lastly the ownership will be further authenticated as it is will simultaneously be recorded on our blockchain giving the garment the immutability it deserves and creating a truly authenticated “Fanwear Original”

What we like to call **“Event Worn Re-Born”**

B. We Serve Two Key Markets

Serving these two markets makes us stronger from a business perspective since we are creating a true value proposition outcome for both in the process

1. For the Licensor/Icon:

We allow the licensor from whom we purchase the original apparel from to achieve far greater financial results by utilizing our program since we not only pay them a fee upfront but also pay them a royalty over time combined with a services agreement.

This combination of payment can end up being as much as ten times what could have achieved financially from the one time sale of a the single garment they could have otherwise auctioned off.

2. For the Fan:

We allow the fan to own a garment such as a sports jersey, T-shirt, hoodie or cap that bears the original fibers of their specific icon/hero.

The fan can purchase a true piece of history for a fraction of the cost of buying the original. At the same time they will have the confidence of knowing that they bought an original, authentic and verifiable product that is ironclad in its warranty.

C. Creating Shareholder Value

Authentic Heroes is a Company built on the premise of being disruptive and efficient. Our R & D has been completed and tested.

The commercialization of these one of a kind processes are now ready to start.

Authentic Heroes will change the collectable/wearable fanwear market as we know it.

Immediate Corporate Goals

We will expand licenses and sales aggressively thru the licensing of:

1. Professional athletes both active and retired.
2. Musicians and touring bands
3. Posthumous Icons
4. Amateur Sports such as NCAA etc.

We expect to achieve significantly higher gross margins than the industry average.

Achieving much higher margins can potentially lead to much higher “price-earnings” multiples which could have a very positive effect on shareholder value.

Current Expectations

Authentic Heroes is currently in the final stages of negotiations for its first several licensed musicians and athletes.

We expect to have agreements shortly which will allow us to launch our new licensed clothing lines later this year.

Whether it be a sporting or musical event. Or any sort of heroic event, Authentic Heroes will be there to help fans celebrate the great moments of these iconic individuals
